ISSA ABDULWARIS ATERE

FRONTEND DEVELOPER

Kwara, Nigeria | issaabdulwaris212@gmail.com | GitHub | Portfolio

PROFESSIONAL SUMMARY

Self-taught Frontend Developer building responsive, type-safe web applications with React, TypeScript, Tailwind CSS, and Supabase. Experienced in authentication, Row Level Security, server-state management with TanStack React Query, and runtime validation with Zod, as well as diagnosing production issues across proxies, serverless functions, and deployments. Studying Computer Science and Computer Engineering; seeking an internship or junior frontend role where I can contribute to well-tested, user-focused products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React 18/19, React Router, TanStack React Query, React Hook Form, Context API, Framer Motion
Backend & Database: Node.js, Express.js, Supabase (Auth, RLS, Edge Functions), PostgreSQL, REST APIs
Validation & Testing: Zod, Vitest
Styling: Tailwind CSS, DaisyUI, Responsive Web Design
Tools & Workflow: Git, GitHub, Vite, Vercel, Axios, npm, ESLint, Husky

PROJECTS

Foreign Exchange Checker

Tech Stack: *React, TypeScript, Vite, TanStack React Query, Zod, Axios, Tailwind CSS, Supabase Edge Functions (Deno)*

- Built a currency exchange rate checker with live conversion and historical rate trends using the Frankfurter API.
- Deployed a Supabase Edge Function (Deno) as a server-side proxy to resolve CORS restrictions on a third-party API.
- Configured environment-aware routing (Vite dev proxy locally, Vercel rewrites in production) so one relative endpoint works in every environment.
- Validated every API response with Zod schemas and managed caching and refetching with TanStack React Query.
- Debugged production issues across proxy configuration, serverless routing, and environment variables.

Full-Stack E-Commerce Platform

Tech Stack: *React, TypeScript, Supabase, PostgreSQL, TanStack React Query, Zod, Tailwind CSS, Framer Motion*

- Built a full-stack e-commerce app with Supabase Authentication (registration, login, persistent sessions) and a database-backed shopping cart.
- Designed relational tables linking users, products, and carts, and enforced Row Level Security (RLS) so users can only access their own data.
- Managed server state with TanStack React Query and validated API responses with Zod to keep invalid data out of the UI.
- Implemented product search, filtering, cart management, and quantity updates; stored product images in Supabase Storage.
- Designed responsive layouts for mobile, tablet, and desktop.

E-Commerce Web Application

Tech Stack: *React, JavaScript, REST APIs, Tailwind CSS*

- Built a responsive shopping interface consuming REST APIs, with product listings, filtering, and cart management.
- Developed reusable React components and optimized client-side rendering for a smoother user experience.

Personal Portfolio Website

Tech Stack: *React, Tailwind CSS, Vite*

- Designed and built a responsive portfolio showcasing projects, technical skills, and GitHub repositories.
- Optimized performance and accessibility across screen sizes.
